

I am a person whose passion is the technology with a metodic mindset restless to learn more and be a better person, worker and friend. Currently, I am studying in seventh semester at the Technological Institute of Colima with an excellent performance, also I have a B2 English certification given by Technological Institute of Monterrey.

In a near future, I want to be a senior developer in a big company at Mexico, where I might have the opportunity to innovate or create new technology to solve the biggest problems that the people have nowadays.

My family is my principal motivation, I imagine how both of my parents despite of the null support of their family and osculates. They achieved what they are right now. Me that I have both, I want to grow up like them practicing honesty, dedication and showing myself that ain't no mountain high enough when you have a dream.

In the last 2 years, I have been working at "Secretaria de la juventud", while studying computer systems engineering, recently I had the opportunity to be part of the BrightCoders Academy and improve my skills in web development, leadership and fellowship.

EDUCATION

2016 - Today

Bachelor of in computer systems engineering in Colima Institute Technology.

May 2018 - Aug 2019

English certification in Monterrey institute of Technology.

WORK EXPERIENCE

► Bright Coders Academy/ Donadores Compulsivos

Jul 2019 - Today

Apprentice

I had the opportunity to continue the project "Donadores Compulsivos" that was started by another team. I have a team conformed by 3 people with whom redesign and improve the web page. For this project, I am working with Ruby on Rails for the Back End and Front End, Heroku to make deploys and Devise for the users login.

► Beauty shop appointment system

Jun 2019 - Jul 2019

Front End developer

I made this project with a small team in Colima, where we had to create a system. The system consisted on an administrative app, where only the employees can manage the information of the customers and there is also a mobile version focused on the clients. In this project I worked with ReactJS and Firebase for the administrative app and React Native, React Navigation and Native Base for mobile.

► Cursteria

Jun 2019 - Oct 2019

Front End developer

I had the opportunity to develop this project with a team of 4 people. The project was about a mobile app, where its principal objective was to teach anyone specific subjects with multiple choice activities. The activities were created to help people to improve their knowledge. I used for this project React Native, React Navigation and NativeBase.
